5. Buscar de 3 a 5 imágenes o fotografías que sean referentes para el tipo de portafolio que les gustaría crear o puedan servir de ayuda para brindar información a la página.

Hi, I'm Stéphanie, a **UX Researcher & Product Designer**.

Great design is where user needs and business goals meet. I seek to understand both to design **user-centred, inclusive and accessible** products and service, mostly in **Enterprise UX**.

I also **write** articles on my blog, **teach** design and **talk** at conferences & workshops events all around the world. And I recently wrote a **book on User Journey Maps**.

I also enjoy drawing fun little things, riding my bike in Luxembourg countryside, exploring new cooking recipes and playing video games. I'm sadly better at keeping my game teammates alive than most of my plants. But, I try. 🌱

I'm an expert.

I spent the last decade helping clients in different industries (banking, financial, automotive, healthcare, press, travel, etc.) **delivering successful projects to their users**, all the way from strategy to the final products and services. I specialise in:

UX Research

I have a user centered approach to design and problem solving. I start with **user research** to understand their needs and painpoints. Then I prototype a solution and test, iterate until it's the perfect solution for them.

UX & Product Design

I design **user friendly, inclusive and accessible products**. I also work directly with development teams to deliver useful design specifications; user flows, mockups, design systems, interaction guidelines, etc.

Enterprise UX

Complex business processes that involve 20 columns data tables do not make me bat an eyelash. I love a good challenge and will make your **employee tools and services** more user friendly and efficient.

Mobile Strategy

If you need assistance crafting an **incredible and fast mobile user experience** from native apps to responsive websites, get in touch!

I help other people grow.

On **my blog**, I share advice on user research, design, usability. Every week, I share a review of useful resources and articles to help the community grow. I've also collaborated with Smashing Magazine, The Pastry Box, Codrops, etc.
